

HMSLink

Advanced Reporting System

Efficiently manage your credit card sales with HMSLink, a Web-based transaction reporting system that helps you monitor your sales activity, previous statements, authorization records, and much more. With HMSLink, you'll gain easy, online access to a comprehensive selection of secure reports 24/7, alleviating the need to make phone calls or wait for hard copy reports. And since all of your company's transactions are kept in the system for 12 months, you'll no longer need to go searching through stacks of receipts or boxes of files.

With HMSLink's expansive database, easy-to-use features, and unbeatable responsiveness, you'll find all the data you need to help manage your business and save valuable time.

- Comprehensive Reports
- 24/7 Online Access
- Cost Effective
- Easy to Use

Get More Control

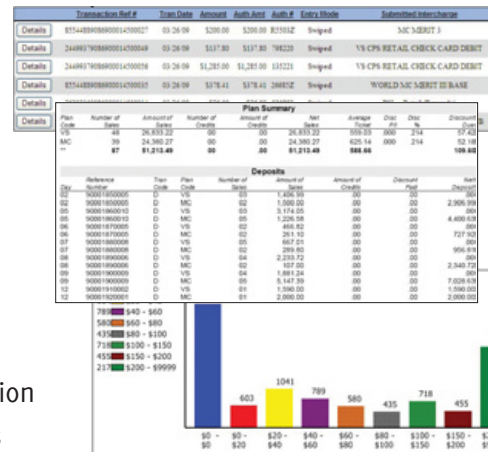

With HMSLink, you can download your sales activity and create custom reports. This powerful feature gives you the ability to evaluate sales trends and use transaction data to improve your business results.

Efficient access to card data allows merchants the ability to reduce fraud and risk potential, respond to and manage historic and current chargebacks, audit daily funding, and reconcile funding records to bank statements.

HMSLink allows multi-user access, with proprietary password protection for varying data levels.
